

PHYSIO WEBSITE REDESIGN – DOCUMENTATION

Student Details

Name: Sahil Pravin Ghadi

Course: B.Tech CSE (Data Science)

Project Type: UI/UX Website Redesign (Figma)

1. Introduction

This project is a UI/UX redesign of a physiotherapy website based on Physio Active India. The redesign focuses on improving layout, usability, and visual design.

2. Objective

- Improve UI design
- Make navigation simple
- Create modern layout
- Improve user experience

3. Problem Statement

The existing website has complex layout, less attractive design, and difficult navigation.

4. Proposed Solution

The redesigned website provides clean UI, better structure, and improved interaction.

5. Pages Designed

- Home Page
- About Section
- Services Page
- Contact Section

6. Features

- Modern homepage
- Service cards
- Call-to-action buttons
- Clean navigation

7. Workflow

User → Home → Services → Select Service → Contact

8. Tools Used

Figma (UI/UX Design & Prototyping)

9. Conclusion

This project improves the usability and visual design of a physiotherapy website.
